Professional Summary

I am a Solution-driven Frontend Engineer with over 4 years of hands-on experience in the technology industry. I have a proven track record of completing projects through all stages of the product lifecycle, including requirements analysis, data modeling, design, development, documentation, and delivery. My expertise includes integrating design patterns and implementing best practices for consumer-oriented software development in both startup and large, established organizations with a global reach. I have also contributed to open source packages and have experience using distributed computing platforms and real-time processing tools to solve real-world problems. I am proficient in various analytical tools, languages, techniques, frameworks, and architectures, and am skilled in collaborating with other developers and engineers to deliver high-quality, scalable data solutions. I have a broad-based expertise in driving system design and programming across multiple industries and platforms.

Skills Highlight

- Highly adaptable with outstanding leadership, interpersonal, organisational, time management, and communication skills.
- Successfully leads and manages projects through coordination, thinking strategically with clear direction.
- Knowledge of core software languages and tools, framework, and architecture.
- Executing web-based front-ends..

- Able to deliver independently or as a functional team member with little or no supervision.
- **Web Services (Frontend):** JavaScript (ES15+/TypeScript), Vuejs, Nuxt.js, React, React Native, HTML, CSS, SEO, Git (version control), Technical writing, GraphQL, Rest Api.
- **Cloud Services & Platforms:** CI/CD processes, Git.
- **Test-Driven Development:** Jest, Mocha, Cypress.

Career Achievements

- Facilitated the development of the booking app that helped patients find Doctors and health care providers.
- Championed the development of a job hiring platform Ayagigs that recruiters post freelance jobs on and job seekers with the specific talent apply for those jobs.
- Conceptualised an abstraction layer for users to create email templates using the email template editor,
- Actively worked alongside multiple pharmaceutical providers to develop and implement Drugstoc, an online platform with a 20-minute delivery service for pharmaceutical products.
- Created a Glossary site that helps users find the meaning of email marketing terms.
- Designed a payment platform that helps users get paid and grow their business.
- Worked with a team to build an API that helps distribute insurance products and process claims 10x faster.
- Designed a collaborative and decentralized farm management software to help farmers in emerging markets maximize profits.
- Designed the User Interface for curacel's documentation <https://docs.curacel.co/> .

Professional Experience

Ownage, Nigeria – Frontend Developer (Full time)

May, 2023 - Present

- Assisted in building Approve/Deny for creating multiple checks tailored to the organization's specific needs
- Built transfer file share(tfs) for sharing sensitive files via the command line

- Currently Building Talksay for converting tokens into ETH gas.

ReactJs, React Native, VueJs, HTML, CSS, Javascript, Typescript

Curacel, Nigeria — Frontend Developer (Full time)

May 2022 - May, 2023

- Developed complex responsive web and mobile interfaces.
- Carried out automated end-to-end tests and cross-browser testing to ensure optimal website functionality and compatibility across all devices and browsers, resulting in improved user experience and reduced support tickets.
- Developed new user-facing features for Curacel's <https://grow.curacel.co/> and <https://claims.curacel.co/>, which led to increased coverage in target markets.
- Improved developer experience by improving atomic components of designs resulting in reduced development time.
- Optimized web and mobile applications for performance and scalability resulting in increased page load, speed, reduced load time, improved rendering time, and reduced bounce rate.
- Tracked and analyzed user interactions resulting in increased customer retention, through A/B testing and other user behavior analysis techniques.
- I stayed current with the latest emerging technologies, best practices and standards. This has enabled me to proactively identify and implement solutions that enhance security, improve accessibility and compliance, increase efficiency and scalability, and ultimately drive business growth.
